

Supporting educational pathways

The use of ICT and content transmitted via ICT has a direct impact on pedagogy and new ways of teaching.

1

Curriculum adaptation that allows prioritisation and flexibility of content, according to the preferences of students and current regulations.

Adaptation of in-person education

2

Monitoring tools and monitoring of online work, and synchronous online lessons.

How is assessment carried out in the majority of countries?

- Descriptive conceptual reports.
- Monitoring schemes.
- Learning portfolios.
- Without exams.
- Pending challenge: formative assessment.

3

Tackling work with collaboration, resilience, empathy, self-knowledge and tenacity, together with unique aspects needed for each individual context.

Adaptation of remote education

4

Greater attention to well-being and the strengthening of students' socio-emotional skills.
