

The link between the school and at home support

The role of family and caregivers in school education has become critical for pedagogical continuity.

What is required?

 **Alternative channels of communication.**

 **Strengthening of the relationship between the school and the adults at home.**

Mental health has been threatened by isolation and economic insecurity, and has revealed the importance of:

- Spaces for active listening and support.
- Well-being guides for students and adults at home during COVID-19.
- Socio-emotional support teams.
- Socio-emotional support service, either by telephone or virtual channels.
- Videos with physical activity routines and healthy eating guides.
- Campaigns such as “You are not alone” for students at risk of violence.
- Transfer of students to “Residential Shelter Centres” if they do not have an active caregiver.
